29th September, 1960COCOM Document No. 4167 BCOORDINATING COMMITTEEMEMORANDUM BY THE ITALIAN DELEGATION  
EXPORT OF ROLLER BEARINGS TO POLAND

2-STP

The Italian authorities have received an application to license the export to Poland of two roller bearings covered by Item 1601 and having a unit value of \$ 860.

The bearings in question have the following characteristics:

International type RIV 11122  
Reference SKF 230/560  
Dimensions (in mm.): 560 x 820 x 195.

This equipment is requested by the Warsaw "Impex Metal" company and will be used as spare parts for bearings for dryers used in paper-mills. This exclusive use is confirmed by the technical characteristics of the bearings themselves.

The usual guarantees against the re-export of this equipment have been obtained from the Polish authorities.

In view of the very small number of parts, purely civilian in use, the Italian authorities would like to grant the licence, and submit this case under the terms of the special procedure applied to Poland.

The Italian Delegation would remind the Committee that a proposal to export bearings identical to those included in the abovementioned order has already been approved by the Committee on the 10th March 1960 (COCOM Doc. 3914). They would be glad if views could be given on this case within the shortest possible time.
